

Frozen Meat Block Flaker

Product Description:

Frozen meat cutting flakes machine is specially developed for crushing meat without bone frozen from -18 °C to -24 °C. It is directly cut into small pieces or sheets.

The production capacity is 4-5 tons per hour. This machine saves the understanding of frozen section, greatly shortens the meat processing time, reduces the cost and time, maintains the freshness of meat, reduces the infection rate of bacteria, and improves the product quality.

Features:

Frozen meat slicing machine is the first choice for meat processing and quick freezing industries. It can cut frozen meat from unthawing from -18 °C to -24 °C, 5-40 kg into pieces or flakes directly. It is the preceding process of chopper and meat grinder, and is also the preferred equipment for pre-treatment in oil plant. The frozen meat slicing machine can cut all the standard meat pieces into slices in 13 seconds. Avoid pollution and nutrient loss caused by the mitigation process, ensure the freshness of meat, can save the ice refrigeration process, reduce the user refrigeration costs. Automatic production line can be customized according to customer requirements, saving labor and improving production efficiency.

Technical Specifications:

Item	Index	Photo
Model	BG-700	
Power	11kw, 380v/50hz/3 phases	
Filling Capacity	3000-4000kg/h	
Feeding Channel width	510mm	
Feeding Channel height	210mm	
conveying stroke distance	700mm	
Size of processing raw materials	700x510x200mm	
Knife roll rotational speed	335rpm	
Material	SUS 304 stainless steel	
Machine Weight	700kg	
Dimensions	2600x1150x1300mm
